

## EPCOR FOUNDRY

aluminum sand castings, finishing,  
and prototyping for many industries

A Division of  **SEILKOP**

IATF 16949:2016

**WE POUR QUALITY INTO EVERY CASTING.**  
*Established in 1946.*

### WHO WE ARE

EPCOR Foundry is a world class aluminum foundry producing high-integrity, leak-tight castings for demanding applications. Since 1946, we've earned a reputation for consistent quality, responsive service, and long-term customer relationships. As an IATF 16949-certified facility, we serve industries that rely on castings that perform.

### QUALITY YOU CAN COUNT ON

- ✓ PLC-based process controls ensure repeatable precision
- ✓ Critical feature validation with dimensional and leak-path inspection
- ✓ Comprehensive post-casting services including NDE, precision machining, and finishing
- ✓ Full traceability with inspection documentation
- ✓ Certified to IATF 16949 quality standards

### WHAT WE DO

- ✓ Green Sand Aluminum Castings
- ✓ Leak-tight and pressure-rated parts
- ✓ Complex geometry and cored cavities
- ✓ Prototype and production volumes
- ✓ Stable and reliable U.S. supply

### ENGINEERING ADVANTAGE

Our in-house engineers work directly with customers to optimize tooling, casting design, and manufacturability. From CAD and simulation to rapid sampling, our process minimizes risk and maximizes performance. EPCOR's technical expertise leads to faster development and stronger results.

### LET'S WORK TOGETHER

Need a casting supplier you can count on?  
*Let's start the conversation.*

# BUILT TO PERFORM

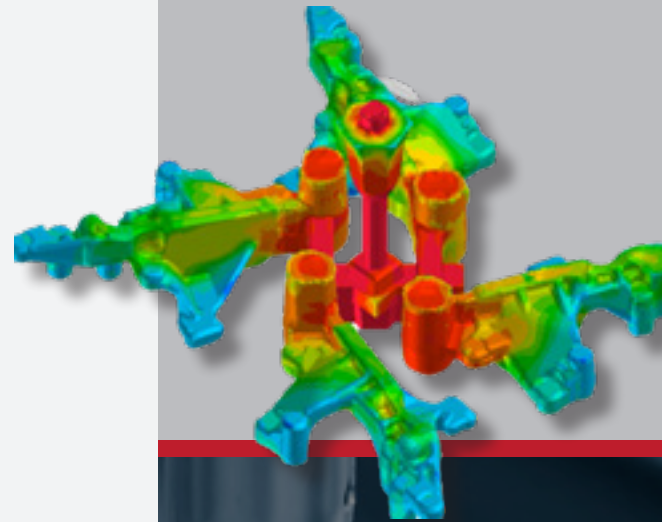

For nearly 80 years, EPCOR has delivered precision aluminum castings with exceptional reliability. Whether you're launching a new design or reproducing a critical legacy part, our team ensures every casting meets performance and tolerance requirements.

We don't just pour metal - we pour experience, engineering, and pride into every casting. Our customers value EPCOR for our technical insight, responsive service, and commitment to doing things right the first time.

## WHY CHOOSE EPCOR

- ✓ Founded in 1946 with decades of casting expertise.
- ✓ Family-owned and operated with a focus on long-term partnerships.
- ✓ Advanced simulation software for gating, fill, and solidification.
- ✓ In-house engineering and tooling development.
- ✓ Seamless transitions for take-over or transfer tooling.
